**Test Information**

i1: Allergen, Food, Macadamia Nut IgE

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

i2: Allergen, Interp, Immunocap Score IgE  
 REFERENCE INTERVAL: Allergen, Interpretation

Less than 0.10 kU/L.....Class 0.....No significant level detected  
 0.10-0.34 kU/L.....Class 0/1...Clinical relevance undetermined  
 0.35-0.70 kU/L.....Class 1.....Low  
 0.71-3.50 kU/L.....Class 2.....Moderate  
 3.51-17.50 kU/L.....Class 3.....High  
 17.51-50.00 kU/L.....Class 4.....Very High  
 50.01-100.00 kU/L.....Class 5.....Very High  
 Greater than 100.00kU/L..Class 6.....Very High

Allergen results of 0.10-0.34 kU/L are intended for specialist use as the clinical relevance is undetermined. Even though increasing ranges are reflective of increasing concentrations of allergen-specific IgE, these concentrations may not correlate with the degree of clinical response or skin testing results when challenged with a specific allergen.
