0.71-3.50 kU/L.....	Class 2.....	Moderate
3.51-17.50 kU/L.....	Class 3.....	High
17.51-50.00 kU/L.....	Class 4.....	Very High
50.01-100.00 kU/L.....	Class 5.....	Very High
Greater than 100.00kU/L..	Class 6.....	Very High

Allergen results of 0.10-0.34 kU/L are intended for specialist use as the clinical relevance is undetermined. Even though increasing ranges are reflective of increasing concentrations of allergen-specific IgE, these concentrations may not correlate with the degree of clinical response or skin testing results when challenged with a specific allergen. The correlation of allergy laboratory results with clinical history and in vivo reactivity to specific allergens is essential. A negative test may not rule out clinical allergy or even anaphylaxis.
