07-Dec-18 07:21:00 Zinc Quantitative, Whole Blood:  
 INTERPRETIVE DATA: Zinc Quantitative, Whole Blood

Elevated results may be due to skin or collection-related contamination, including the use of a noncertified metal-free collection/transport tube. If contamination concerns exist due to elevated levels of blood zinc, confirmation with a second specimen collected in a certified metal-free tube is recommended.

Zinc concentration in blood has not been shown to change significantly in deficiency or with supplementation.

Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement B: aruplab.com/CS
