Zinc, Serum/Plasma	120.1 H	ug/dL	[60.0-120.0]	19-077-900074	18-Mar-19 10:22:00	18-Mar-19 10:22:00	18-Mar-19 10:23:07

18-Mar-19 10:22:00 Zinc, Serum/Plasma:
 INTERPRETIVE INFORMATION: Zinc, Serum or Plasma

Elevated results may be due to skin or collection-related contamination, including the use of a noncertified metal-free collection/transport tube. If contamination concerns exist due to elevated levels of serum/plasma zinc, confirmation with a second specimen collected in a certified metal-free tube is recommended.

Circulating zinc concentrations are dependent on albumin status and are depressed with malnutrition. Zinc may also be lowered with infection, inflammation, stress, oral contraceptives, and pregnancy. Zinc may be elevated with zinc supplementation or fasting. Elevated zinc concentrations may interfere with copper absorption.

Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement B: aruplab.com/CS
