 INTERPRETIVE INFORMATION: Human Surfactant Protein D (SP-D)

Human Surfactant Protein D (SP-D) is a non-specific indicator of lung inflammation or damage. Elevated levels are associated with various types of interstitial lung diseases (ILD).

Abnormal SP-D results should be interpreted in the appropriate clinical context. A negative result does not rule out ILD.

Test developed and characteristics determined by ARUP Laboratories. See Compliance Statement D: aruplab.com/CS.

 INTERPRETIVE INFORMATION: Krebs von den Lungen 6

Krebs von den Lungen-6 (KL-6) is a non-specific indicator of lung inflammation or damage. Elevated levels are associated with various types of interstitial lung diseases (ILD).

Abnormal KL-6 results should be interpreted in the appropriate clinical context. A negative result does not rule out ILD.
