- Medical eye exam
- Medical visits not related to lens wear
- Contact lenses
- Refraction fee

# Contact Lens Fitting Policies and Program

## The Eye Exam

Before you can be fitted for contact lenses, a complete medical and refractive examination is necessary. This exam is critical to assuring the good health of your eyes and ruling out the possibility of any unsuspected, underlying condition which may prevent contact lens use. If contact lenses are feasible, the eye exam will help select the most appropriate lens material and design.

## Contact Lens Fitting

The goal of contact lens fitting is to find the most appropriate contact lens for your optimal comfort and vision. An enormous variety of types, styles, materials, sizes and colors are offered. We are committed to taking the time and making the effort to fit you properly. Although many patients need only one fitting session, some require several appointments. In our experience, the extra time, effort and patience are very worthwhile, both for your ultimate satisfaction and the health of your eyes.

## Insertion & Removal – Care & Handling Training Session

During the appointment, our contact lens specialist will provide personalized instruction in the safe care and use of your new lenses. Should further time be required, we will be happy to schedule an additional session (without charge). Upon completion of a successful insertion and removal session, you may begin wearing your lenses, after which we will schedule your first follow-up appointment. When your instruction session is complete, you will be asked to sign the following agreement.

*"I understand the importance of adhering to the lens care procedures and instructions that I have received. I understand that I am responsible for scheduling and keeping my appointments and that failure to do so could result in damage to my eyes or contacts."*

## Follow-up Appointments

One or more follow-up appointments will be necessary to assure that your contact lenses continue to fit well and your eyes remain healthy. Charges for follow-up visits during the first three months are included in the contact lens fitting fee.

## Contact Lens Fitting Policy

The physicians with the Moran Eye Center charge a fitting/follow-up fee that includes the contact lens fitting, a starter lens care kit, insertion and removal lessons, trial lenses if appropriate, and the various visits needed for three months.

# Ordering Contact Lenses

Contact lenses can be ordered at any time after the fitting is complete. You can order as many lenses as you would like, up to a year's supply, which is your best value. We recommend an annual eye exam for the safety of your eyes. We will not be able to refill prescriptions that are more than one year old without another exam. A written prescription will be given at the completion of your fitting session that will expire one year after your last exam date.

## Payment

The fitting and follow-up fee is to be paid on the day of fitting. Lenses are to be paid for when an order is placed.

## Lens Changes

If a patient originally fit with one lens requires a change to a more expensive lens, the difference in the fitting fees will be charged. No refunds will be given for the fitting services.

Any lens changes made after the three month follow-up visit will incur a refitting fee.

## Refunds

Because of the advanced materials being used to make contact lenses and our extensive experience fitting lenses, we have had very few patients who are unable to wear contact lenses. If, however, either you or your doctor decides to stop the fitting of the contact lenses, a refund of the cost of the lenses may be given during the warranty period. No refund will be given after three months. There will be no refund of the fitting fee.
