

Switch to Order Management Today.

The **Order Management Suite of tools** represents the next generation to System2000 and is conveniently built into our web-based portal, ARUP Connect. **Order Management is available today** and we encourage all System2000 users to make the switch and enjoy a more efficient and easier digital workflow. We have listened to your needs and have built Order Management with numerous significant improvements. Please see the features comparison chart for details.

Feature Comparison Chart

Features	Order Management	System2000
Key Needs in a Single Location	Order Entry, Order Status and Results, eExcept are all together within ARUP Connect system.	Requires calling ARUP for exceptions, special notes, and a separate login for Connect.
Paper trail / Storage / HIPAA Security / Auto-print	Only print orders as needed, and batch download for convenience. Reports can be directly emailed to clinician or easily attached to EMR patient record with no unnecessary paper trail. Digital workflows are both familiar to users and easy to adapt to. A notification system is being developed to alert lab workers to new reports.	System2000 auto-prints. However, unmonitored printouts is a HIPAA risk, and could be misplaced or lost. Requires manual workflow to scan, shred, and store paper reports, increasing turnaround time to attach reports to EMR or email to clinicians.
Easy to Use, Multiple Users	Simple, intuitive, and modern interface requires limited training to get up and running quickly. Multiple users can access the system at the same time.	Simple, DOS-based system built on soon-to-retire Windows XP system, only one user can access the system at a time.
Patient History Reprints and Records Attachments	Patient history reports and enhanced reports are available within the Order Management system. Patient reports can easily be attached to patient records within the EMR.	Must place a separate call to ARUP Client Services to get patient history, enhanced reports, and chart reprints. Requires manually scanning paper reports into hospital EMR through records department.
Lab Space Needs and Maintenance	Uses existing lab computers with internet access. No additional space or maintenance requirements.	Requires extra lab space for special hardware and printers, and requires assistance from ARUP to update and maintain.
LIS Label Compatibility	Existing LIS labels are compatible for printing through the Order Management system.	Existing LIS labels are compatible for printing through the S2K system.

Features	Order Management	System2000
Communication with ARUP	Order Management is built within ARUP Connect. It provides one central location and one login to receive communication, ordering, charting, and patient registration from ARUP.	S2K system is separate from ARUP Connect, requires multiple places to receive communication from ARUP.
Comments, exceptions, or order updates	Order Management offers commenting for special instructions to the lab, order updates, exception handling, and other critical lab needs.	Must call ARUP Client Services to relay special instructions, exceptions, or order updates.
Future Service and System Performance	Web-based service can easily be updated with new features to meet lab needs.	S2K is being retired by ARUP & S2K foundation system (Windows XP) will no longer be supported by Microsoft as of April 8, 2014
Data Entry	Auto-fill features reduce time spent adding information to an existing patient record, and has collection date/time built in. Intuitive patient registration reduces data entry time.	No auto-fill collection date/time features or patient registration features.
Turnaround Time Improvements	Enhance turnaround time by attaching results directly to clinician email or to EMR.	Requires paper scanning into system to attach to EMR or email.
Prompts for exceptions, additional Info	If additional information is required on a test, such as for a reflex test, Order Management has built-in prompts to alert the user.	No built in prompts, likely requires a separate call to ARUP Client Services.
Lab Test Directory search	Search for tests by name or number to easily access ARUP's Lab Test Directory or ARUP Consult while placing a lab order.	No access to ARUP's Lab Test Directory or ARUP Consult without separate computer access.
Quick Views	Can quickly view test result highlights for past seven days	No quick view features.
